brimwd.github.io

I've worked as a designer and developer for the last 8 years: 4 years leading teams; 4 freelancing. I am organized, detail-oriented, and resourceful; I create solutions that are extensible, responsive, and lean.

Empathy and integrity are the most important traits to me; empathy empowers me to recognize challenges and design for the user, to relate to and collaborate with my team, and to translate needs and requirements between stakeholders, designers, developers, and users.

Integrity to me means not only getting the job done, but doing it right the first time. Issues that are out of scope for v1 are documented and prioritized for v2; important work doesn't slip through the cracks.

Being predictable and consistent and resolving issues openly not only fosters trust between team members, but it fuels innovation by creating an environment that is inherently collaborative.

As a life-long artist, I've volunteered my graphic design skills for several non-profits, and a previous employer described me saying "giving back is a huge part of Brian's ethos."

When I'm off the clock, I'm often hard at work on one of my hobby projects. My current project is organizing and producing a TV show based on a script I wrote last year with a friend. Previously I've run an indie game studio which produced several game prototypes, and I've taught classes on web development, illustration, and coffee brewing techniques.

Brian Donahue

UX Designer & Front-End Developer

SKILLS

WORK EXPERIENCE

Jul 2017 - Present
UX ENGINEER

Bluetooth SIG

I'm working with the UX team to design and build a new style guide to unify the visual style of their various tools. The process started with analyzing the existing assets and defining requirements. Currently we are conducting user interviews.

Jan 2017 - Present
**DESIGNER
DEVELOPER**

ScheduleUX.com

Working at Amazon I often wished there was a service to easily schedule participants for usability studies; I designed ScheduleUX to address that need.

I am responsible for all of the product design, UX and UI design, workflows, data processing, and front-end development.

Brian Donahue

UX Designer & Front-End Developer

Mar 2016 - Dec 2016 [Amazon.com](#)

UX DESIGNER

I worked on information architecture (taxonomies), user data collection research, and UI/UX design for administrative tools that both internal and external users would be using.

I conducted multiple usability studies and supported the team with a variety of design tasks including redlines, illustration, icon design, and usability research.
